

Don't be put off by the long instructions - you only need to follow them once to have RealOne Player set up on your computer forever.

To get RealOne Player for free, follow these instructions:

1. Download the RealOne Player from the link on the site
2. This takes you to a page where you need to register as a new customer (even though you're not buying anything). On the next page you will be asked for some details and to make a password. Complete the boxes, and make sure you remember your password - you will need it later!
3. On the following page, you should click on the link of the nearest location to you. Picking the nearest place should make your download quicker.
4. When you've clicked on the link it will bring up a file download box - this will begin saving the program to your computer. Select "Save this program to disk" and then "OK".

5. Another box pops up, which lets you choose where to save the program. From the "Save In" menu select "Desktop" (Saving it on the desktop means you'll be able to find it easily).

6. Click on save and the RealOne Player will start to download - it may take some time.
7. Once downloading has completed, double click on the file icon (a RealPlayer symbol) on your desktop. RealOne Player will begin to set up on your computer.
8. From here, follow the instructions that RealOne Player gives you - all you really need to do is skip through the screens by clicking on "Next" - though if you're feeling adventurous, you could change some of the settings - but make sure you know what you're doing!
9. Once it's finished installing, RealOne Player will start - from here you can close it down, and then click on the links to listen to audio and watch video - whenever RealOne Player is needed, it will automatically start!
